

# DATA BREACHES AND CYBERCRIME VICTIMISATION

**1 in 10 respondents (9.3%)**

said they were notified their information was exposed in a data breach in the 12 months prior to the survey.

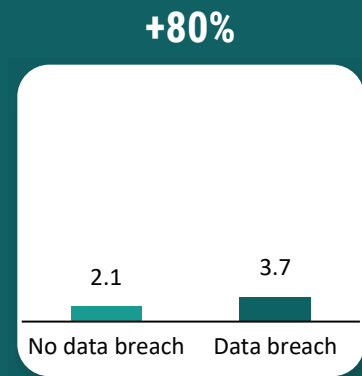

These respondents were more likely to also be victims of other types of cybercrime:

**Identity theft**

**Online scam or fraud**

**Ransomware**

Most common warning signs of being a victim of identity theft:

Bank said their identity was stolen or account misused

Unauthorised activity on credit card

Suspicious transactions on bank statements

Being refused credit

Missing or strange bills

Calls about unpaid bills

These were all **more likely** among respondents who had been notified their information was exposed in a data breach.
